

Presents  
***Course #200***

***The California Air Pollution Professional***

*This one day course presents the “big picture” of the air pollution control profession in California. The course includes review of the applicable laws and regulations, inspection tips and techniques, preparing and processing a violation case, and field safety. Although it is primarily designed for field inspectors, other professionals, such as permit engineers, rule writers or any other delegated officers of a related agency will also benefit. Students are encouraged to share their experiences.*

**Friday, October 12, 2012**  
**8:30 am – 3:00 pm**

**San Joaquin Valley APCD  
Modesto Office  
4800 Enterprise Way  
Modesto, CA 95356-8718**
